But this game was released many years ago on Android. Most Android users know about the game. Also, the game has been a trendsetter for some years. Sonar Kera team developed and released the game in Google Play Store. Compared to other racing games, this game has been made with simple 3D graphics with addictive. Most of the games are made with high-quality 3D graphics. But no more addition, not during the gameplay. Traffic Racer MOD APK is made with a combination of Racing with Arcade. We told that in every combination game, combined category games are performed fantastically. Same this game also perform extraordinary level with the latest gameplay. In between the race time, no more milestones will appear. Endless racing has been made here has been introduced in the game. Of course, many racing games are available with limited areas like Asphalt and Real racing series. Those game tracks are made with loop styles or limited endsides. But the developer made this game with unlimited ways and endless roads. So players drive the car on endless highways at top speed of vehicles. Realistic racing Traffic Racer MOD APK comes with a realistic racing game and has many features. In our opinion, it's one of the best racing games ever created. It gives you a sense of driving a real car on an open road and hard to drive a car on highways. On both sides of the road, many vehicles have going front and back. Without hitting to drive the car is an impossible one. After entering the game, the player will feel the real-life racing in high way. Of course, until the end of the game, you can make the race on highways only. No more limited tracks and roads appear. Environments Commonly, the race has been assigned in the daytime or nighttime. But Traffic Racer MOD APK race has contained up to 5 different environments with complex objects. This is the way the player can drive the car in multiple seasons. Currently, five environments are only available to play. Suburb, desert, snowy, rainy, and city night are only available in the game. But each season has been made with sharpened and detailed quality. So the player can make it more accessible to identify all objects in the game. Mostly we love to play the night mode in the game. It will give many scary moments and more challenging gameplay. Also, every player learns the gameplay strategy.

In snow time, the roadside has been filled with snow and ice. The car has been overdriving during the ice roads. So carefully drive the car. Controls Traffic Racer MOD APK offers two different types of control. The player chooses these two controls from settings. Of course, you can change the vehicle controls in the setting. Currently, two types of controls are available to play. Change the controls settings to Tilt and Touch to steer. We prefer to choose touch steering control for all types of racing. Tilt control is not suitable for the racing time. If your driving is well in racing time, the gas level has been increased. Touch the blue colored gas button to make the car 2X faster. Yeah, each good drive, your car gas has been refilled. The brake button appeared until the end of the race.
